

# IOOS National Glider Data Assembly Center

Becky Baltes (IOOS), Luke Campbell (ASA), John  
Kerfoot (RU-COOL), Walt McCall (NDBC), Derrick  
Snowden (IOOS), Bill Smith (NDBC)

# Background

- Construction began in 2013
  - 2 NetCDF specifications
  - Current Version running since late 2014
- Goals:
  - Simple file format & submission process for data providers
  - Provide data access via existing web services, in a variety of well-know formats
  - Facilitate the distribution of data sets to the Global Telecommunication Service (GTS)
  - Permanent data archive (NODC)

# Glider Types

- Glider types (currently only profiling gliders)
  - Seaglidors
  - Spray
  - Slocum
- Future:
  - Surface/horizontal sampling platforms
    - Waveglider
    - Submaran UUSV
    - Remus

# NetCDF File Specification

- Simple format describing a single profile
- Aggregated to create CF-compliant trajectory profile file type representing a single deployment
- Original data resolution preserved.
- Current focus: CTD and derived properties and u/v estimates.
- Future (2015 and beyond): O<sub>2</sub>, optics, ADCP and others.

# Resources for Data Providers

---

- Github:
  - <https://github.com/ioos/ioosngdac>
- Wiki:
  - <https://github.com/ioos/ioosngdac/wiki>

# Submission Process

---

[ioos.gliders.ops@noaa.gov](mailto:ioos.gliders.ops@noaa.gov)

- Data provider registration (1-time only)
- Active deployments require a WMO id (assigned by the DAC via NDBC), which are reused provided the glider is deployed in the same WMO region
- Deployment registration
- Upload (ftp) NetCDF files

# Deployment Registration

# Deployment Locations

# IOOS Glider DAC Data Flow

# Benefits for Data Providers

- Assimilation of glider data sets into local, regional, global scale models via GTS
- Multiple public access points, providing access in a variety of formats
  - ERDDAP
  - THREDDS
- Permanent data archive
- RA recognition
- IOOS data catalogs
- Discoverability
- IOOS RA Compliance

# Current/Future Work

## Encourage Participation from RAs: What are the impediments?

- Community Contributed Toolboxes
- Compliance enforcement
- Addition of O<sub>2</sub>, optics, ADCP, etc., data
- Confirmation of GTS transmission w/ OSMC
- Client-side data visualization
- Quality Assurance/Control
